-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 4, 6, 7, 9, 11, 14, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wolpert in view of Adorjan '749 (Adorjan).

Wolpert prefers the use of cylindrical sections because they are cheaper and easier to obtain from a manufacturing point of view. However, while Wolpert uses cylindrical sections he does disclose tapered sections on page 2, lines 30-33.

Wolpert does not disclose a plurality of weights or stiffening members. However as disclosed by Adorjan it is known in the art to use such 11. It would have been obvious to one of ordinary skill in the art to have used such on Wolpert's stick as well to help weight and balance it as desired.

Adorjan does not give the exact length of his weights or members 11 but their length would obviously have been up to the ordinarily skilled artisan depending on how much weight one wished to concentrate in a single member. Absent some showing of unexpected results the claimed range is not considered to have been unobvious to the ordinarily skilled artisan.

Wolpert discloses that any smooth surface finish may be used and the examiner takes official notice that chrome-plated steel is a commonly known smooth surface finish. As noted previously applicant did not dispute this fact.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over the art as applied to claim 11 above, and further in view of Voje. Claim 11 is obviated for the reasons explained above with the exception of the selection of cue tips. However, as disclosed by Voje it is known in the art to provide such with cues. It would have been obvious to one of ordinary skill in the art to have done the same with Wolpert's cue to provide spare tips.

Claims 3 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Adorjan '489 has been cited for interest because it discloses a similar cue.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication should be directed to Mark S. Graham at telephone number 703-308-1355.
